IPaT In Coda

IPaT Fall Schedule

Everyday Georgia Exhibition Sept 27, 2018

GVU / IPaT Research Showcase Oct 10, 2018

Thursday Think Tanks

Thursdays, 3:30-5pm
Sept 13, 20; Oct 4, 18, 25; Nov 1, 8

Convergence Innovation Competition (CIC)

Nov 14

Games for Change Jams

many dates...

IPaT Research Directors Sept 13, Nov 1, Nov 29
8:30-10am

IPaT Holiday All Hands

Dec 12

Thursday Think Tanks

The TTT is a weekly gathering of the IPaT community to brainstorm about research, stay informed about ongoing work and opportunities, and help define IPaT strategy.

Come interact with new and old colleagues and engage on topics of shared interest.

Fall 2018:

- Sept 13 Atlanta Map Room
- Sept 20 The Reality of Poverty in a STEM Environment
- Sept 27 Everyday Georgia reception
- Oct 4 Robert Wood Johnson Foundation
- Oct 18 Computing & Society
- Oct 25 Creating a Smart Campus
- Nov 1 Mobile Health Platforms
- Nov 8 Future of esports

Georgia Tech IPaT

Thursday Think Tank

EVERY THURSDAY
3:30-5PM

IPaT SUITE 600
CENTERGY BUILDING

The Thursday Think Tank is a weekly gathering of the IPaT community to brainstorm about research, stay informed about the work that everyone is doing, and help define IPaT strategy. Listen to a short presentation, then discuss and brainstorm.

email: ipat@gatech.edu

Convergence Innovation Competition (CIC) Wednesday, November 14

Bi-Annual competition

- Over 100 students annually
- <http://cic.gatech.edu/>

Categories:

- Climate Solutions
- Active Aging
- Players & Fans

Think your idea doesn't fit?

Ask us—categories are intended to shape, not exclude.

**Benefits: Prizes, Exposure,
Contacts, IP retained,
& Real world feedback**

**Submission deadline: @Midnight
Sunday 11/11/18**

The CIC is held on the Atlanta campus
and at Georgia Tech Lorraine

Interested? Questions?

Contact GT-RNOC

IPaT's Vision, Mission, and Research Pillars

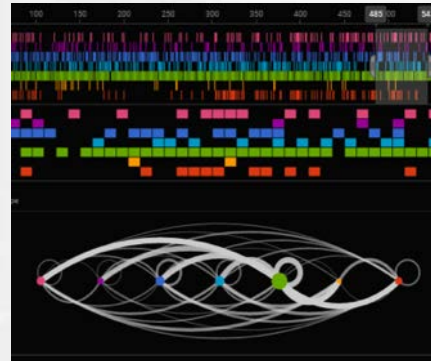

Shaping the future of human-centered systems, environments and technologies to promote satisfying, healthy and productive lives.

Catalyze interdisciplinary research between faculty, students, and industry.

Provide the continuity and capacity to address societal challenges.

Advocate for socio-technical change that improves the human condition.

Educate human-centered engineers, scientists, designers, business leaders, and policy makers.

Research Pillars

Lifelong Health and Wellbeing

Smart Cities and Inclusive Innovation

Platforms and Services for Socio-Technical Systems

Shaping the Human Technology Frontier

Aging

- Emory / GT / Cox Foundation create Mild Cognitive Impairment Empowerment Program, \$23.7M
- TechSAGE 2 RERC
- ERC Planning Grants + Engagement Grant

Pediatrics

- Access to Preventative Dental Care (NIH, 1.5M)
- RWJF IRL: Community-Based Approaches

Two new **Diabetes Translational Research** seeds grants

CHHS: 10th annual conference and 8th for PE

IPaT Research Infrastructure

- 3rd party HITRUST Certification for HIPAA compliant environment
- CMS DUA updated to allow remote access and use of shared resources

From pediatrics to aging, IPaT's continuum of healthcare research is working to promote and enable vibrant and lifelong physical and mental health.

Smart Cities and Inclusive Innovation

GA Smart Communities receive funding and support to envision, explore, and plan for their smart futures.

- City of Albany, City of Chamblee, Chatham County, Gwinnett County + GT Researchers

CEE researchers developed a **hybrid traffic simulation of North Ave**; mix of preprogrammed & real-time data-driven intersections.

Open Government Data in the Smart City: Interoperability, Urban Knowledge, and Linking Legacy Systems

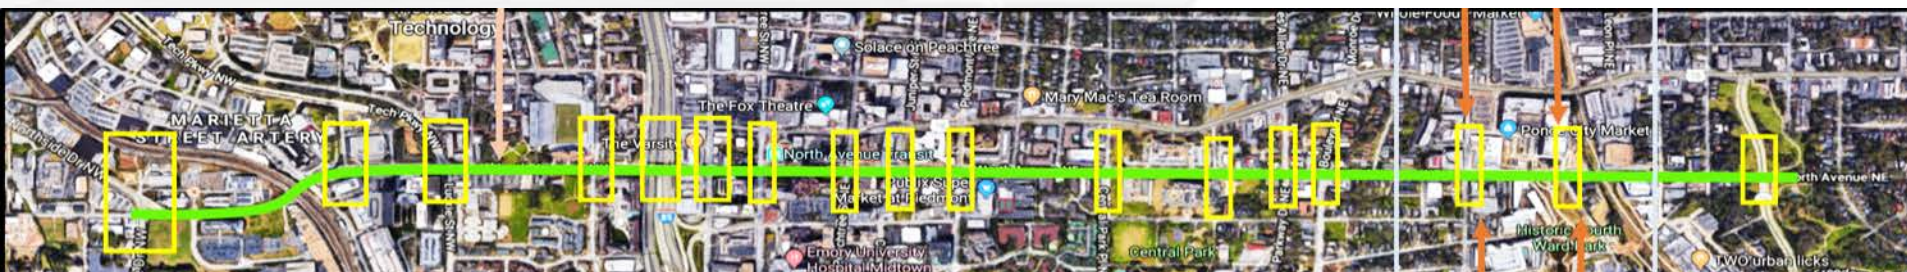

- Society and Computing Engagement Grant
- Smart Campus Engagement Grant

IPaT Research Infrastructure: **CoA Data**

Smart Bases and Smart Installations : Marine Logistics Command in Albany GA

Through interdisciplinary expertise in technology and policy, IPaT is developing innovative approaches to shaping resilient and sustainable communities.

NSF: Broadening Participation in Computer Science Through Programming and the Arts Across Learning Spaces

Digital Drawer (NEH) with Historic Rural Churches of Georgia

IPaT Research Infrastructure: Mobile App Development and Publishing Support

Mobile Media Surveys and Data Visualization for Zika Surveys, CDC

Engagement Grants

- Manufacturing and VR
- Wearables and the Arts
- esports

We're exploring new ideas in user experiences that foster creativity, stimulate learning and enable productive collaboration. Through this initiative, we're researching and developing novel wearable computing, assistive, augmented reality, and gaming technologies.

Platforms and Services for Socio-Technical Systems

Smart Sea Level Tools for Emergency Planning and Response

Careful Coding partnership with Westside: Tools for data quality control, data wrangling, and contributing to resident data literacy

Rqmts and Design for Diabetes-and-Work Clinical Decision Support, CDC/NIOSH

Medicare/Medicaid Information System, GA Dept of Community Health

IPaT Research Infrastructure: Refreshed VM hosting infrastructure; Project storage on the way and support for new Cloud resources; Openshift environment up and hosting m.gatech.edu

Platforms and Services for Complex Ecosystems

Quantifying Ecosystem Transformation (Intel)

Decoding Digital Infrastructures and the Boundary Resource Economy (Google)

Understanding Ecosystems of Hype (NorthernLight)

IPaT is merging physical and digital worlds with complex data analytic and communication capabilities. We are building new network infrastructure technologies with the goal of creating connected systems that support communities.

Platforms for Competitive Intelligence

Socio-technical systems are complex, dynamic, evolving, and global. Comprehensive insights into such systems are crucial for anticipating risks, identifying opportunities, and managing growth. Yet, actionable insights are difficult to achieve as existing tools, data, and methods have significant limitations.

The focus of this initiative is to

- Build an interdisciplinary community of scholars and practitioners, across GT and beyond, that is interested in defining the future of competitive intelligence
- Establish a research agenda that identifies grand challenges and opportunities across different domains
- Facilitate knowledge exchanges between industry and academia
- Identify and advance the state-of-the-art in competitive intelligence tools, data, and methods
- Enable funded research streams

Source: Quid/Google Images

Project Research Activities

- Visualizing and Analyzing Complex Emerging Systems (e.g., AI industry, Connected Vehicles, APIs, IoT, Platform Economy, etc.)
- Computational Modeling of Multi-Level System Phenomena (Technologies, Products, Services, Firms, Ecosystems)
- Curation of Structured, Unstructured, Alternative Datasets

TOWARDS A CENTER FOR COMPUTING & SOCIETY

ELLEN ZEGURA
CARL DISALVO
MICHAEL BEST

CREATING THE NEXT®

WHY COMPUTING AND SOCIETY?

The influence of computing is remarkable, and its future frequently touted as unbounded. Yet against this backdrop of unprecedented development lays sobering recent events in which computing has managed not to advance society, but instead to fray it.

SET TO TESTIFY
Will appear before congress on Sept. 5th

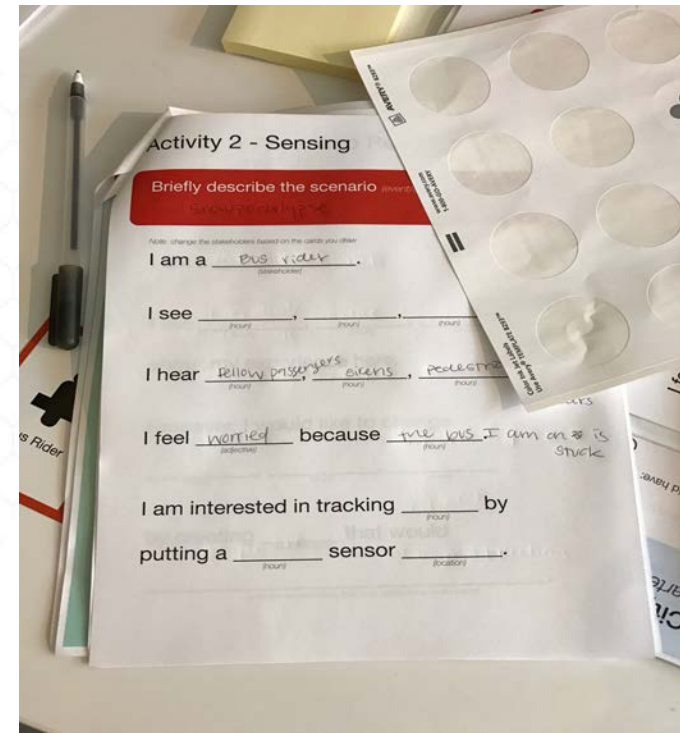

Sheryl Sandberg
Facebook COO

Jack Dorsey
Twitter CEO

Bloomberg

WHY COMPUTING AND SOCIETY?

The time is right – indeed urgent – for computing as a diverse community to mature and take ownership of the many steps needed to mitigate negative impacts of research and development, as well as harness computing in service of pressing social problems.

COMPUTING AND SOCIETY THEMES

- Data Justice
- Peace Technologies
- Civic Media

- Poverty
- Class
- Gender
- Race
- Democracy
- Markets

- Int'l Development
- Smart & Connected Comm
- Education & Informal Learning
- Data Science

HOW?

- This center is an open work
- We are taking a participatory approach to defining it's goals, processes, and structure
- GVU/IPaT funding will be used to support a design workshop for the center

HOW CAN YOU PARTICIPATE?

- Bi-weekly Engagement Group (“C&S Tea”)
 - Informal project presentations
 - Group discussion
 - Convivial snacks and drinks
- Mailing list (subscription info shortly)
- IPaT Think Tank on Thursday, October 18, 3:30-5pm

Connecting Georgia Tech with the Future of ESports

Laura Levy
Institute for People and
Technology

Anne Sullivan
School of Literature, Media,
and Communication

CONNECTING GEORGIA TECH WITH THE FUTURE OF ESPORTS

Laura Levy & Anne Sullivan

What is the future of the esports fan experience and how can we help define it?

PALADIN

FUTURE OF ESPORTS

- Designing towards an esports culture
- Supporting fan experience between games
- Fan acquisition
- Attracting/supporting diverse communities
- Appreciating feats by players
- Connecting fans and players

VIP CLASS – FUTURE TECHNOLOGIES OF SPORTS

- Fall 2018 - future
- Handpicked students to work on industry problems
- Working with Braves, GTAA, Hi-Rez

- Funding to support travel to
 - Blizzard Arena, OWL Season Game
- Connecting industry and Georgia Tech for new research opportunities

The Mild Cognitive Impairment Empowerment Program's Innovation Accelerator:

Building a Diverse Coalition of Students, Faculty and Researchers to Address Aging-Related Cognitive Impairment

Craig Zimring
Jennifer DuBose
Gabrielle Campiglia
Herb Velazquez
College of Design

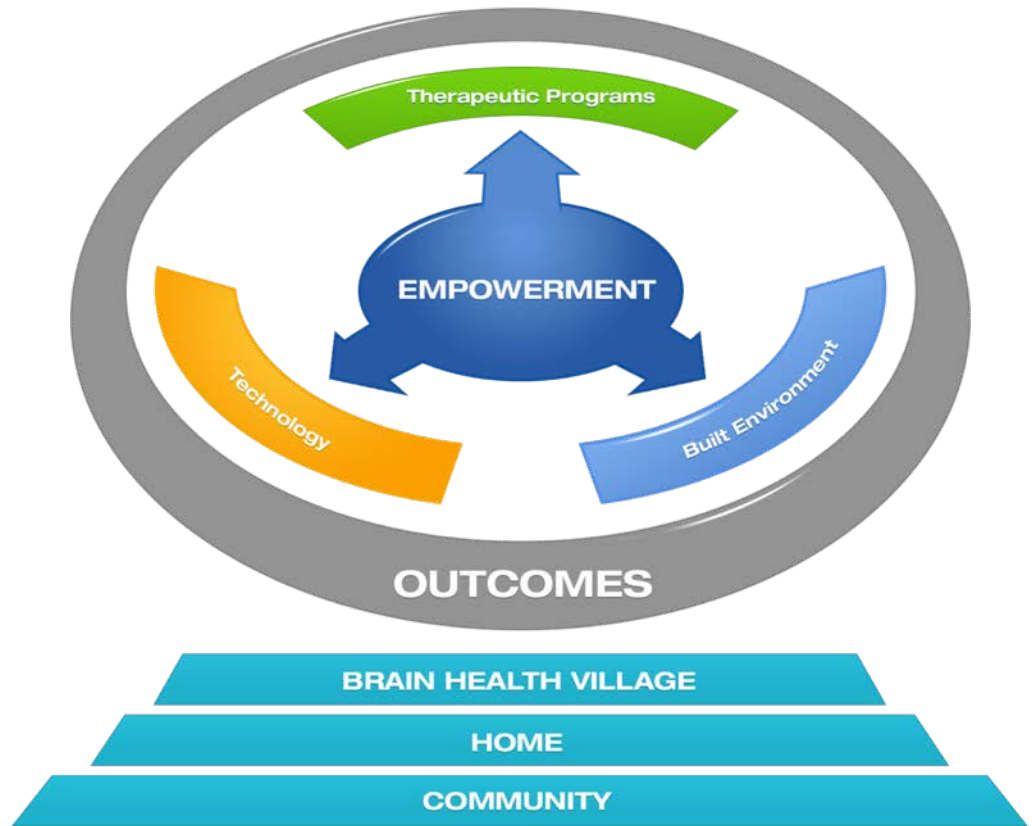

Brian Jones
IMTC

Brad Fain
GTRI

MCI Empowerment Program

- Part of larger Brain Health Village
- ~4-year program to provide a day program and home support for people with MCI (“fellows”)
- GT is key player
- Technology and built environment have integral roles, led by GT faculty
- Monitoring technology will be installed in 60 homes
- GT to run Innovation Accelerator

BUILT ENVIRONMENT PROJECTS

Lead: Craig Zimring

Empowerment Center at the Brain Health Village
a one-of-a kind evidence-based empowerment center

Support Social Interaction
in physical and virtual space

Use Light and Sound
to improve mood and sleep

Human Centered Design
inspiration,
ideation, testing,
&
implementation

Safe Smart Kitchen
to increase independence

TECHNOLOGY PROJECTS

Leads: Brian Jones and Brad Fain

Innovate mobile support for therapeutic program, caregivers, and activities on the go.

Encourage exercise and social interaction.

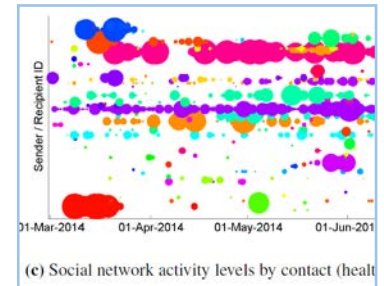

Ensure safety during daily activities in the home.

Track progress to inform sustained care.

Support memory room to room and based on schedules, calendars and time of day.

Measure key changes in sleep, gait, physical activity, and social interaction.

INNOVATION ACCELERATOR PROCESS

Lead: Jennifer DuBose

Co-Design with Fellows

Include people with MCI to define problems and innovate solutions

Course based projects

From Industrial Design, CS, HCI, ARCH, and others

Industry Engagement

Attract industry to collaborate on solutions for successful aging

Seed Grants

For GT/Emory teams 3 a year at \$50,000 each

WHAT IS THE POTENTIAL BENEFIT TO YOU?

Access to

- Brain health fellows (aka patients) and their care partners
- Homes of the fellows for research and deployment
- Providers and clinicians for collaborating
- Rich set of data from fellows in the program
- Real world problems for student projects
- Annual seed grant opportunities in therapy, technology and built environment innovations to empower people with cognitive impairment

HOW CAN YOU ENGAGE?

- Fall meet up to introduce campus community to issue and solicit input (Date TBD)
- Spring meet up to further develop core synergies identified at first meet up (Date TBD)
- IPaT Think Tank on January 24th
- ERC Planning Grants on Aging at GT
 - Augmentation Systems and Intelligent Support Technologies for Aging (Co PI Mynatt)
 - Engineering Research Center for Aging-centric Engineering Technologies (AgETech) (Co PI Hertzog)
- Website and listserve forthcoming, for now.....
 - Contact Jennifer DuBose at Jennifer.dubose@design.gatech.edu to be added to group list

Building Capacity for Sustainable, Interdisciplinary, Smart Campus Research: A Needs Analysis

Matt Sanders
Institute for People and Technology

Russ Clark
School of Computer Science

Building Capacity for Sustainable, Interdisciplinary, Smart Campus Research: A Needs Analysis

Multiple Smart Campus efforts underway including: smart buildings, student health and wellness, energy management, future workspace and data center, and automated transportation.

Each of these have long range ambitions tied to Georgia Tech's strategic plan and have the potential to fuel Georgia Tech researchers for decades to come.

Goal: find repeatable and sustainable models for the support of long running, multi-disciplinary projects/studies across time and space.

Join us at the Think Tank:

Thursday, October 25th

Initial Focus:

- Data Use Agreements & MOU's
- Accessible Data
- Repeatable Processes/Procedures
- Reliable and Accessible Platforms for service operation and research
- Proven Funding Models (sponsored, operational, self sustaining)
- Student engagement models

Initial Community:

- LBC & Coda Research Neighborhoods and Operators
- Global Change, Serve Learn Sustain, and GVU, and IPaT SCC Communities
- GT Auxillary Services, Health Center, Facilities, OIT, Space Planning, etc.

Understanding the Changing Nature of Work

Chris Le Dantec, Digital Media

Thomas Kurfess, Mechanical Engineering

Alyssa Rumsey, Digital Media

Understanding the Changing Nature of Work

Manufacturing facilities present an opportunity to understand how digital technologies like AR/VR impact workplace practices

- Research Question: What is the impact of VR for engineering analysis on the nature of work?
- Formed a new partnership with GE Aviation - Human Factors and Maintainability Group to conduct a usability study in the field
- Intersection with NSF Future of Work initiatives at the Human Technology Frontier

Professor Chris Le Dantec
Digital Media Program
ledantec@gatech.edu

Alyssa Rumsey, PhD Student
Digital Media Program
arumsey3@gatech.edu

Georgia Smart Community Challenge

Debra Lam, Managing Director
Smart Cities and Inclusive Innovation
IPaT

Projects

Chatham County

City of Savannah,
Creative Coast

Improve flood warnings,
emergency response action
plans, flood predictions for
future flood events

- Test a pilot sensor network for sea level flood risk during natural disasters
- **Kim Cobb, School of Earth & Atmospheric Science**

City of Albany

Dougherty County,
DCA, Initiative for
Community
Housing, Fight
Albany Blight

Improve measurement of
public funds allocation,
neighborhood infrastructure

- Evaluate an automated housing registry to support property inventory management
- **Omar Issac Asenio, School of Public Policy**

Gwinnett County

GDOT, Cities of
Berkeley Lake,
Duluth, Norcross,
Suwanee

Improve connectivity, safety,
quality of life

- Evaluate traffic management technologies for improved vehicle mobility
- **Angshuman Guin, School of Civil and Environmental Engineering**

City of Chamblee

City of Doraville,
MARTA, Assembly
CID, Stantec

Reduce road congestion,
increase pedestrian and
traveler safety, improve
community equity

- Study mobility improvements using AVs which travel from MARTA stations into the community
- **Ellen Dunham-Jones, School of Architecture**
